Subject: Requested Information

Brandon;

Per your request from our telephone conversation last week, please see attached Sampling and Analysis Plan for the North Pole Refinery Laboratory Area Screening Groundwater Investigation and the subsequent ADEC approval letter.

<<North Pole Refinery Laboratory Area Screening Groundwater Investigation SAP.pdf>> <<fhrapprovalletter.PDF>>

You had also requested figures illustrating historic potential source areas and a copy of the sump and drain report. With regard to identification of historic source areas, that analysis is being performed as part of the overall site characterization activities scheduled to be completed in the second quarter of next year. As this analysis is not yet complete, the associated figures have not yet been prepared. Once the analysis is complete and the figures have been prepared, we will transmit a copy to you. With regard to the sump and drain report, we are currently working to complete that document and anticipate its submittal to ADEC within the next month. We will transmit a copy to you when we submit to the ADEC.

If you have any questions or comments, please feel free to call myself or Elizabeth Page.

Thanks

Marc
